

REMARKS

Claims 1-11 and 13-19 were presented for examination as a division of USSN 09/831,244. A preliminary amendment was entered, inadvertently omitting dependent claim 12, which was present at the filing of the parent application.

The present amendment responds to the Office Action mailed December 19, 2003.

Applicant is pleased to comply with the Examiner's requirement for identification of the present application as a divisional. An amendment in the specification at page 1 is proposed to provide the identification of the present application as a division of the parent case.

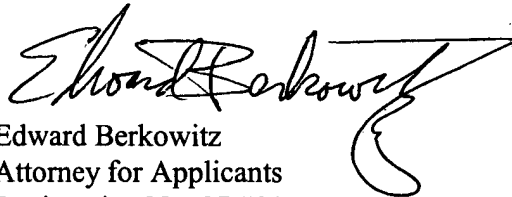

Previously omitted claim 12 may be compared to its presence on the originally filed parent application. The wording is changed slightly to comport with the wording of its dependencies.

The Examiner's objection to claims 2-11 and 14-19 is removed by incorporation of the limitations of claim 2 into claim 1 and addition of claim 12. There is but the one independent claim 1 and the Examiner's objections are removed as to the entire claim set.

The Examiner has required addition of legends to figures 1, 5, 7A and 7B. Applicant is pleased to comply. However, commonly understood circuit symbols have not been decorated with such legend.

Applicant has endeavored to comply with the Examiner's objections and requirements and believes that the present claims, as here amended form a proper set for allowance.

Respectfully submitted,

Edward Berkowitz
Attorney for Applicants
